DIRECTOR

Hang on. **04:12** and **10:37**. Is that the same line? Feels like it.

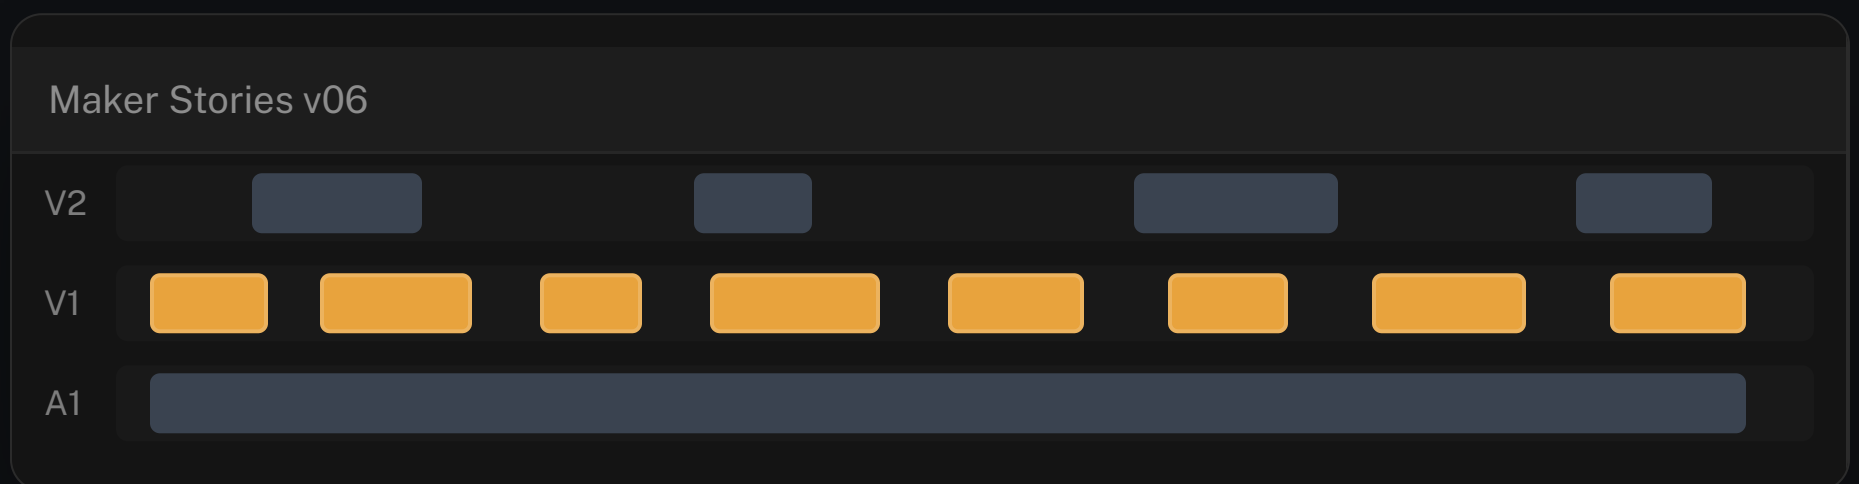

One interview, eight bites cut from it. Somewhere in there, two of them are the same answer.

SWIPE →

Premiere says the interview is used eight times.

True, and no help. Every bite from an interview is a use.

The list can't say which two are the same part of the answer.

Trace colour-matches the repeats.

“Yep. Same line.”

Trace won't tell you which one to cut. It just saves you matching them up by ear.
