

Swap the shot. Keep the grade.

Opt/Alt

+

drag

Replace a clip →

REPLACE A CLIP IN THE TIMELINE

- 1** Hold Opt (Mac) or Alt (Windows)
- 2** Drag the new clip from the Project panel
- 3** Drop it on the clip you want gone

WHAT STAYS PUT

Lumetri and every other effect on the clip

Scale, position and any reframe in Motion

The clip's length – the cut around it doesn't move

Want a specific frame?

Set an in point in the Source Monitor, then right-click the timeline clip › Replace With Clip › From Source Monitor.

A Premiere Pro tip, every Monday and Friday.

Save this one for your next edit – and if you've got a better way, tell me in the comments.
