Speed/Duration →

THE CHECKBOX MOST PEOPLE SKIP

Reverse Speed

Maintain Audio Pitch

**Ripple Edit, Shifting Trailing Clips**

Ticked, the clip gets longer and everything after it moves down to make room.

WHILE YOU'RE IN THERE

Reverse Speed – plays it backwards

Maintain Audio Pitch – stops the chipmunks

Unlink the chain – set an exact duration instead of a percentage

Left unticked

A clip at 50% can't grow into the shot next to it – you get the same length showing half the action.

A Premiere Pro tip, every Monday and Friday.

Save this one for your next edit – and if you've got a better way, tell me in the comments.
