Project Manager →

PROJECT MANAGER

Collect Files and Copy to New Location – every file the project uses, in one folder

Exclude Unused Clips – leaves the rushes nobody used

Consolidate and Transcode – just the part in the cut, plus handles

Six months later

"Just a quick recut." Open one folder and everything's online. No relinking, no hunting through old drives.

A Premiere Pro tip, every Monday and Friday.

Save this one for your next edit – and if you've got a better way, tell me in the comments.
