

Adobe Premiere tip of the day

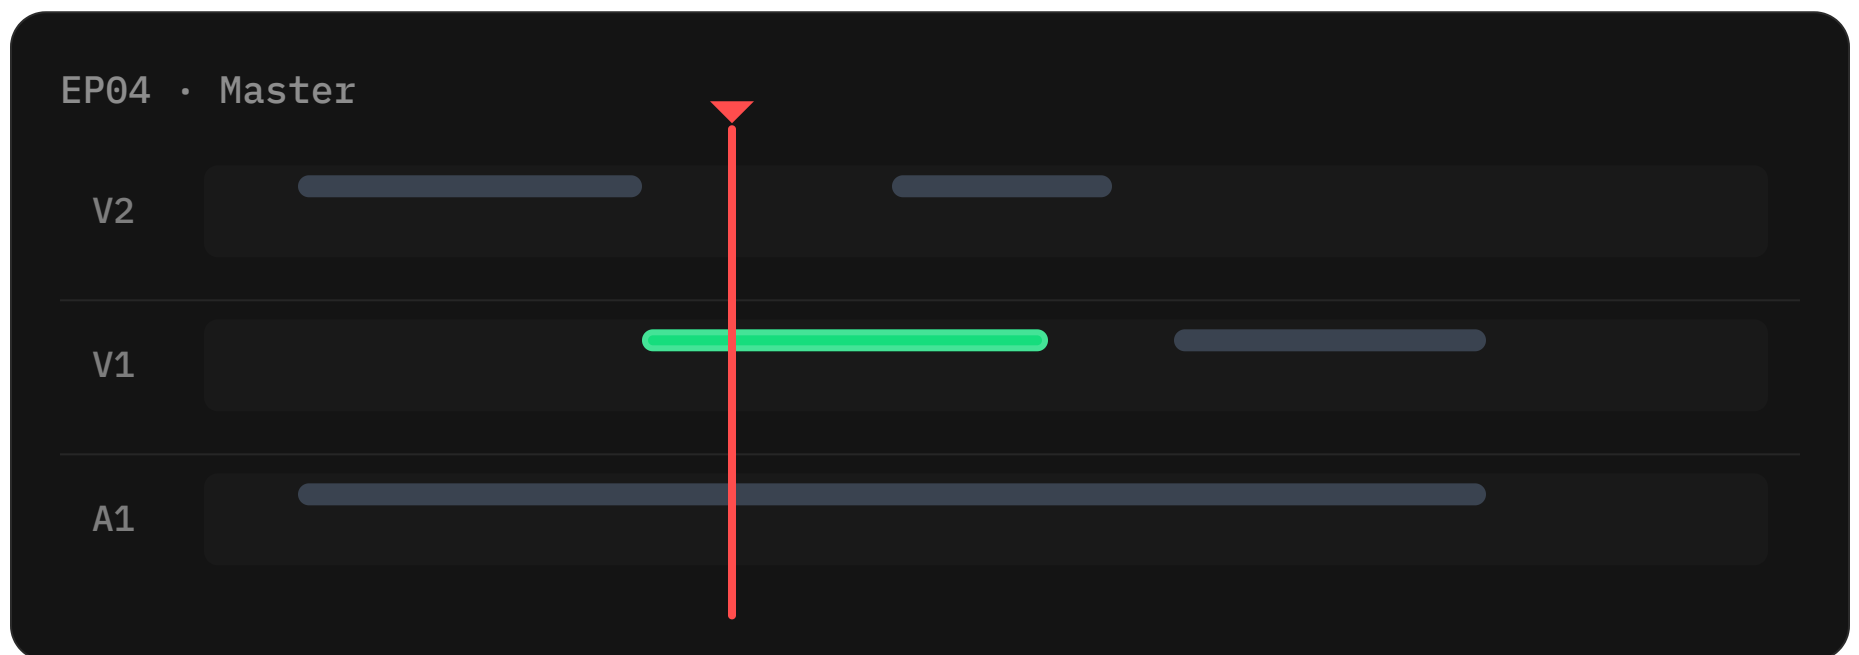

TIP 01 • MATCH FRAME

Press F.
That's the
whole tip.

TIP 01 • MATCH FRAME

“Can we see a bit more before that?”

 You’re parked on the clip. The file it came from is somewhere in a bin with four hundred others.

TIP 01 • MATCH FRAME

Press F.

The source clip, on that exact frame, with the in and out points still set.

TIP 01 • MATCH FRAME

Two things worth knowing.

It works through nests, so a clip three layers down still opens.

If nothing happens at all, your **track targeting** is off. Still catches me out most weeks.

TIP 01 • MATCH FRAME

Give it a go on your next timeline.

No idea why it took me so long to start using it.
