

Adobe Premiere tip of the day

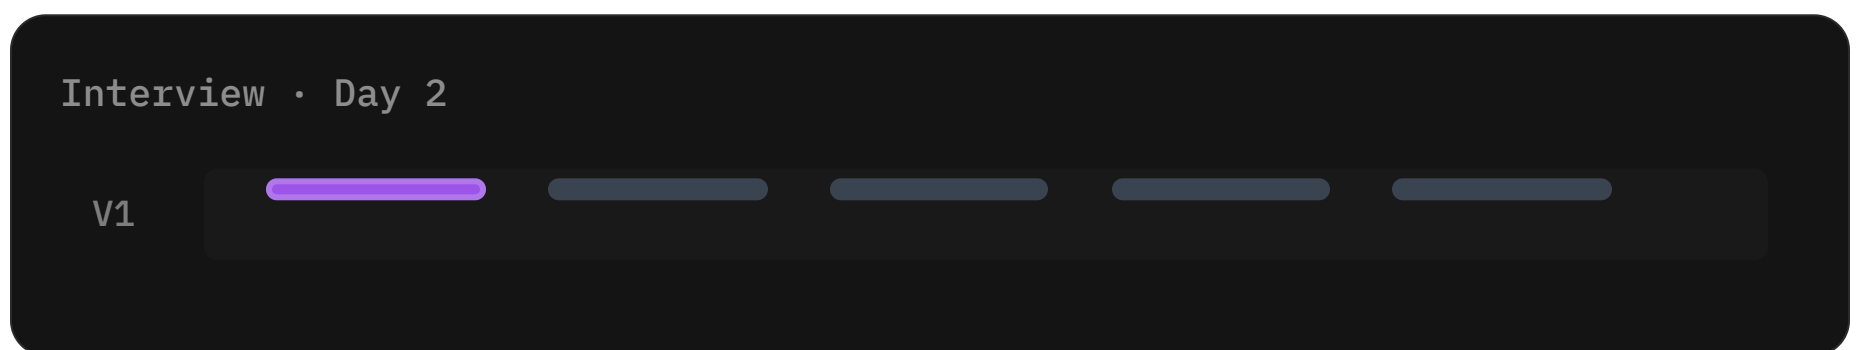

TIP 03 · PASTE ATTRIBUTES

The grade, not the reframe.

TIP 03 • PASTE ATTRIBUTES

One clip graded.
Five more to match.

 Copy the graded clip, select the other five, then Cmd/Ctrl + Alt + V.

TIP 03 • PASTE ATTRIBUTES

A checklist, not everything.

- ✓ Lumetri, motion, opacity, effects, time remapping — tick what you want.

Paste the grade and leave the scale alone.

Two things worth knowing.

- ⚠️ Paste everything onto a wide and you take the **reframe** with it. Nobody notices until the grade.
- 📌 **Scale Attribute Times**, at the bottom, is for when the clips are different lengths.

TIP 03 • PASTE ATTRIBUTES

Tick three boxes.

It is the difference between matching five shots and re-fixing five shots.

- A Premiere tip every week
