

Adobe Premiere tip of the day

TIP 07 • SEARCH BINS

A bin that fills itself.

TIP 07 • SEARCH BINS

Footage arrives
for six weeks.

🔍 “interview” — every new card of talking head

🎵 “mus_” — every cue, including the ones sent this morning

🔍 And reorganising it every Friday is somebody’s afternoon.
Usually yours.

Save the search.

Type it in the Project panel search box, then **File > New > Search Bin**.

Anything new that matches drops in by itself, from then on.

Two things worth knowing.

A search bin is a window, not a folder. Nothing is moved or copied.

Which means your actual structure stays exactly as it was.

TIP 07 • SEARCH BINS

Set it up on Monday.

Then stop tidying on Fridays.

- A Premiere tip every week
